The goals of ED-Tech
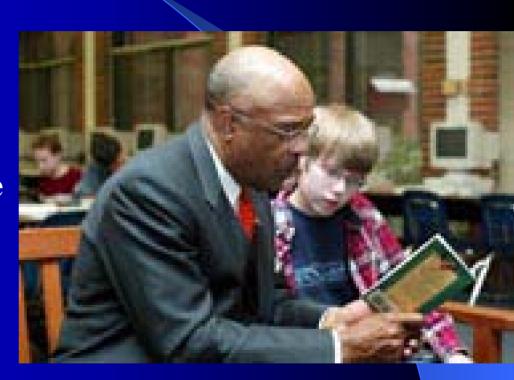

- Improve students' academic achievement through technology

- Assist students to become technologically literate before finishing the eighth grade

- Ensure that teachers integrate technology curriculum to improve achievement
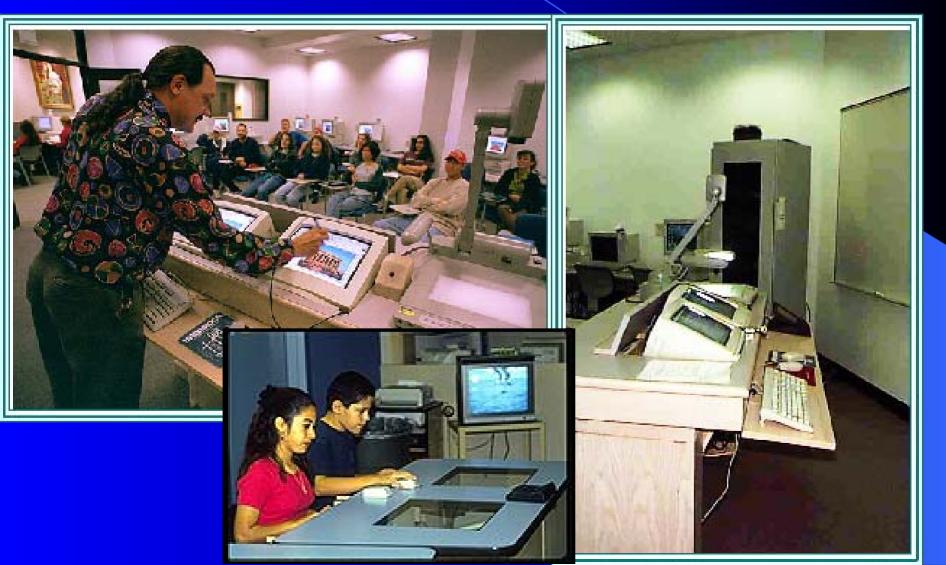

Incorporating Technology in Schools

Incorporating Technology in Schools

- Technology can unlock tremendous potential in students and staff with special and diverse needs

- Administrators recognize the potential of technology and their responsibility to ensure digital equity.

- School districts are incorporating a "Shared Vision For Technology"

Smart Classrooms

Smart History Classroom

Multimedia has brought the past, and current global events, to Blackstock history classrooms

Smart Science Classroom

Blackstock's eighth grade science programs incorporate computer activity and multi-media instructional techniques in all aspects of their operation.

Smart Science Classroom

The science classrooms are all unique in design but they function on a multi-media platform that includes:

- Computer Networks
- VCR's
- Laser disk players
